

innovate.

THE PRESI SIGNATURE. ALL AROUND THE WORLD.

٥

# **MECATECH**, the latest generation of automatic polishing machines BYPRESI

### Innovation.

Equipped with platens from Ø200 to 300 mm, the new range of MECATECH automatic polishing machines has the most advanced technologies.

#### Versatility.

The MECATECH range allows both manual and automatic use.

#### Unrivaled motor power.

Thanks to an motor power from 750W to 1500W, the entire PRESI experience is condensed in this most complete range on the market.

# OPTIONAL

## DISTRITECH 5.1 - Ref. 67890

### Abrasive suspensions dispenser device

#### Compatible with the entire MECATECH range

- Capacity: 5 bottles of 500 cc
- Each abrasive suspension dispenser is managed by the machine
- No risk of pollution: each bottle has its own distribution circuit
- Priming function
- Colloidal silica distribution with automatic rinsing function, no risk of crystallisation

### Reliability and regularity.

Whatever the size or the number of samples, MECATECH guarantees an optimal polishing.

#### Robustness and character.

With its affirmed style and edged lines, this new range is distinguished by its new design with an easily recognizable sleek and refined carbon look.

> LED illuminated display indicates the bottle in operation

Accessories 100%

compatible with the older generation of MECATECH

### Programming and memorization

- Easy creation and modification of polishing methods
- Perfect reproducibility of methods
- Password protection
- A USB connection makes it possible to save the integrity of the registered polishing methods and ensures the evolution of the material

## Large touchscreen

- 7"TFT LCD color display, 16/9
- Ergonomic and intuitive user interface
- Many features:
- Speed and direction of rotation (head and platen)
- Sprinkling
- Drying
- Stage duration
  - Applied force
- Management of Distritech 5.1
  - and the 2 tanks integrated

# POLISHING HEADS

Polishing heads have a :

- Powerful motor gearing driven by a frequency inverter
- Automatic polishing head locking when the cycle starts: avoids every risk of error

• Lateral shifting of the head to completely release the polishing platen and work in manual mode (except for the 300 SPS model)

surveillance.

SP5

Removes shadow areas under the polishing head giving the user better visual control during operation.

Mecatech

### Emergency stop button

Convenient and quick access to the machine emergency stop button to immediately stop its operation.

Programming the value of the desired material removal with central pressure. An ultra-accurate linear gauge (+ or  $-5 \mu$  on a suitable polishing pad) measures the movement of the cylinder. This function frees the operator of tedious manipulations.

### Optimum polishing quality

A proportional electronic valve enables the air pressure to be measured and stabilised at a precise value. The force applied to the samples is perfectly constant and reproducibility is guaranteed.

Lubricants or abrasives distribution is ensured by 2 tanks with peristaltic pump. They avoid a possible heating of the polishing support and ensure a precise dosage which frees the operator from a restrictive

### LED lighting

## **FREQUENCY INVERTER**

which controls the three-phase motor :

- Gives exceptional power to the head and the platen
- Ultra-precise speed variation
- Constant torgue and speed whatever the applied load
- Progressive acceleration and immediate stop
- 2 directions of rotation (head and platen)
- Thermal security in case of prolonged overload

### Easy maintenance

- Additional removable bowl easy to clean
- The tank incorporates an anti-splah device that prevents any projection
- The body and the composite of the removable bowl exclude any oxidation

Driven by a frequency converter and a fully mounted poly-V belt drive, it provides significant work comfort in a lab environment.

# **MECATECH** range

## Platen diameters : 200 to 250 mm

Ref. 67910 Width : 510 mm Depth : 810 mm Height : 665 mm Weight : 73 kg 1 platen - 4 pistons Individual pressure

Ref. 67920 Width : 510 mm Depth : 810 mm Height : 665 mm Weight : 73 kg 1 platen - 6 pistons Central and individual pressure

Compliance

Ref. 67930 Width : 920 mm Depth : 735 mm Height : 665 mm Weight : 98 kg 2 platens - 6 pistons Central and individual pressure

## Platen diameters : 250 to 300 mm

Compliance

Ref. 67940 Width : 620 mm Depth : 875 mm Height : 680 mm Weight : 82 kg

1 platen - 6 pistons Central and individual pressure

## SWEEPING FUNCTION

The MECATECH SPS sweeping function optimizes the use of consumables and improves samples flatness. In addition, productivity is improved by increasing the capacity of the polishing head from 6 to 8 samples.

Compliance

Ref. 67950 Width : 620 mm Depth : 875 mm Height : 700 mm Weight : 96 kg 1 platen - 8 pistons Central and individual pressure

## OPTIONAL MECAPROTECT

This protection hood meets the most stringent safety requirements. It perfectly isolates the machine from the operator. The connection between the machine and the hood prevents the MECATECH from working when the hood is open.

MECAPROTECT 250 Ref. 67915 - MECAPROTECT 300 Ref. 67945
